Nadezhda Sitdikova

PROFILE

Junior software developer with work experience in my home country. Currently enrolled to university for Master's degree. As an employee, I am fast trainable, attentive to details and interested in new technologies, paradigms and programming languages. As a colleague, I am open-minded, collaborative. As a young specialist, I have advanced communication skills and entrepreneurial thinking.

WORK EXPERIENCE

Junior developer
Craft Tables, Moscow
January 2021 – Present
Analyze and optimize the current business processes (BP) by automating them and determining bottlenecks. Develop bots for Telegram messenger in Python and JavaScript, that provide BP's automatization. Use RestAPI of different applications to get or post data through bots. Manage projects remotely with interdisciplinary software teams and stakeholders.

Development engineer
Lexema, Ufa
September 2018 – February 2020
Modeled business processes using IDEFx, BPM, UML notations. Designed software architectures and algorithms for end-user's interaction depending on their roles and permissions. Tested the system according to the designed algorithms. Supported end-users and customers through training. Defined and tracked tasks for software developers in cross-functional teams. Used languages and tools: SQL, JavaScript, VBA, React.

EDUCATION

TU Ilmenau
October 2021 – Present
M.Sc. in Research in Computer and System Engineering

Ufa State Aviation Technical University
September 2013 – July 2018
B.Sc. in Applied Computer Science
